## Webinars

The webinar software from OnlineSeminar has a wide range of possibilities to interact with your Medical Professionals across the globe. Utilize the incorporated functionalities, and you will increase engagement with your target audience in your webinar and gather relevant data. OnlineSeminar would be more than welcome to assist you in organizing your webinar.

## Conference Broadcasting

OnlineSeminar has several mobile studio solutions for onsite broadcasting. Whether it's a one camera set up or a talk show setting for an audience of considerable size, we can facilitate a suitable and affordable solution for every broadcast. OnlineSeminar offers their services around the globe. We can work with your existing conference partners or accommodate a full service conference broadcast setting.

## E-learning

For training professionals who need a trusted platform with deep learning expertise, OnlineSeminar provides a cloud-based learning management solution (LMS) that unifies virtual classroom and webinar capabilities in a secure and scalable platform that can meet your medical education needs.
